## Citizenship

United States

## Experience

June 2019 - present **economist** Federal Trade Commission  
Washington DC

- Work closely with attorneys and economists to model and quantify the effect of mergers and other potentially anti-competitive behavior.

September 2007 - May 2019 **economist** Antitrust Division, U.S. Department of Justice  
Washington DC

- Work closely with attorneys to model and quantify the effect of mergers and other potentially anti-competitive behavior.
- Analyze the effects of various tariffs proposed by the Trump administration.
- Antitrust casework focuses on collusion and monopolization in financial markets, as well as merger analysis in the health insurance, advertising, airlines, and electricity industries.
- Authored code and documentation implementing numerous models to calibrate and simulate the effect of horizontal mergers. Versions of this code has been used in numerous antitrust investigations as well as in litigation.
- Authored code and documentation implementing numerous models to calibrate and simulate the effect of tariffs and quotas.
- Designed and coded web interfaces for merger and tariff simulation.
- Designed and maintained large databases (over 10 TB) for use in investigations and litigation.
