CITIZENSHIP

United States

EXPERIENCE

Federal Reserve Board

PRINCIPAL ECONOMIST

Washington DC

September 2022 - present

- Work closely with attorneys and economists to analyze the effect of bank mergers and divestitures.

Federal Trade Commission

ECONOMIST

Washington DC

June 2019 - September 2022

- Work closely with attorneys and economists to model and quantify the effect of mergers and other potentially anti-competitive behavior.

Antitrust Division, U.S. Department of Justice

ECONOMIST

Washington DC

September 2007 - May 2019

- Work closely with attorneys to model and quantify the effect of mergers and other potentially anti-competitive behavior.
- Analyze the effects of various tariffs proposed by the Trump administration.
- Antitrust casework focuses on collusion and monopolization in financial markets, as well as merger analysis in the health insurance, advertising, airlines, and electricity industries.
- Authored code and documentation implementing numerous models to calibrate and simulate the effect of horizontal mergers. Versions of this code has been used in numerous antitrust investigations as well as in litigation.
- Authored code and documentation implementing numerous models to calibrate and simulate the effect of tariffs and quotas.
- Designed and coded web interfaces for merger and tariff simulation.
- Designed and maintained large databases (over 10 TB) for use in investigations and litigation.

R SOFTWARE PACKAGES

ANTITRUST

- A collection of tools for antitrust practitioners, including merger simulation models, market definition, and equilibrium pricing. Calibrates demand parameters and simulates mergers under various differentiated products demand systems including logit, nested logit, ces, and aids.

TRADE

- A collection of tools for trade policy analysis. Provides trade policy practitioners with a tractable framework for simulating the effects of tariffs, quotas, and other trade policy measures on market outcomes.

COMPETITION TOOLBOX

- A graphical user interface for the antitrust and trade R packages. Provides an interactive interface for conducting merger simulations, market definition analysis, and trade policy analysis without requiring R programming knowledge.

SERVICE

US DOJ/KFTC KNOWLEDGE EXCHANGE PROGRAM

2018

- Organized, co-authored and co-taught a 3 day training program for new economists at the Korean Free Trade Commission (KFTC). The purpose of this program was to train KFTC economists in how to analyze horizontal mergers.

ALGORITHMIC DOCUMENT REVIEW

2017

- Trained a series of machine learning classifiers to predict if a document is pertinent to an investigation. Once these models have been fully tested, they will greatly reduce the time needed to review the massive amount of documents received by the Antitrust Division.

R TRAINING

2012 - present

- Authored and co-taught a series of short courses for Economists and Research Analysts on R. Covered topics included: data analysis, plotting, regression analysis, mapping, interfacing with databases, and antitrust analysis.

AWARDS

TEAM SPECIAL ACHIEVEMENT AWARD FOR WORK ON CAPITAL ONE/DISCOVER MERGER

2025

EAG MANAGEMENT AWARD FOR POSITIVE EXTERNALITY

2019

TEAM AWARD FOR WORK ON ANTHEM/CIGNA LITIGATION

2017

EAG MANAGEMENT AWARD FOR EXTRAORDINARY ACHIEVEMENT

2016

TEAM AWARD FOR WORK ON NATIONAL CINEMEDIA/SCREENVISION LITIGATION

2015

TEAM AWARD FOR WORK ON AMERICAN/US AIRWAYS LITIGATION

2014

EAG MANAGEMENT AWARD FOR PUSHING FRONTIERS

2010
